In the event that specific funds are mentioned please refer to the relevant minimum disclosure document in order to obtain all the necessary information in regard to that fund. Unit trusts are generally medium to long term investments. The value of units go up as well as down and past performance is not necessarily a guide to the future. Should a portfolio have underlying international investments, fluctuations or movements in exchange rates cause the value of those underlying investments to go up or down. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from Ci Collective Investments (RF) Pty Ltd ("Ci"). Commission and incentives may be paid and if so, would be included in the overall costs. Different classes of units apply to these portfolios and are subject to different fees and charges. A fund of fund unit trust only invests in other unit trusts, which levy their own charges, which could result in a higher fee structure for those portfolios. Forward pricing is used. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accrual and less any permissible deductions from the portfolio. Quantifiable deductions are the initial fee and annual management fee indicated above whilst non-quantifiable deductions included in the net asset value price comprise brokerage, auditor's fees, bank charges, trustee and custodian fees. Fund valuations take place at approximately 15h00SA time each day. Purchase and repurchase requests must be received by Ci by 14h00 SA time each business day.
