

# Kruger Ci Balanced Fund

## November 2023

**KRUGER**  
International  
Asset & Wealth Management

### INVESTMENT OBJECTIVE

The investment objective of this fund is to provide investors with capital growth over the short to medium term. The fund may also generate stable income. The fund invests in a combination of equities, listed property, bonds and money market. The fund is aimed at investors who can tolerate higher risk, as explained only by volatility, as it may have a maximum of up to 75% exposure to equities. The fund may from time to time invest in listed and unlisted derivatives, in order to achieve the fund's investment objective. The fund adheres to the prudential investment guidelines set by Regulation 28.

<b>Highest return over 12 rolling months</b>				29.27%
<b>Lowest return over 12 rolling months</b>				-5.80%

### FUND MANAGER'S COMMENTARY

#### International:

Markets closed November in a positive mood thanks to tentative signs of economic moderation in the US and falling inflation across developed markets. Data releases broadly supported the view that central banks have reached the peak of their tightening cycles, aiding both equities and fixed income markets.

Markets were particularly encouraged by the release of the US Consumer Price Index (CPI) reading for October, which was cooler than expected at 3.2% year-on-year (y-o-y) compared to 3.7% for September. The fall raised hopes that inflation could touch 2% before the end of 2024 which reduced investors' expectations of a final interest rate hike by the Federal Reserve (Fed) at its December meeting dramatically. Although the market is convinced that peak policy rates have been reached, the November Federal Open Market Committee (FOMC) minutes made it clear that the Fed is determined to hold policy rates at elevated levels for an extended period of time.

Major stock indices gained over the month, with developed market equities as proxied by the MSCI World Index rising 9.4%, while emerging market equities lagged slightly but still gaining a respectable 8.0%. Growth stocks, in particular the technology sector, outperformed their value counterparts globally.

Yields on global government bonds declined during the month with the US 10-year Treasury yield falling below 4.4% by the end of November, down from the peak of 5% reached mid-October. In Europe, the German 10-year yield fell around 20 basis points. This led to the broad global government bond index adding 4.9% during the month, bringing the year-to-date returns to a flat performance of -0.1%.

#### Local:

South Africa's headline inflation accelerated to 5.9% in October, up from 5.4% in September. This was mainly driven again by higher food and fuel prices with food inflation jumping to 8.8% y-o-y from 8.0% in September, after decelerating for six consecutive months.

Following the hawkish stance maintained during the September Monetary Policy Committee (MPC) meeting, subsequent developments have strengthened the stance of maintaining a stable interest rate, leading to the South African Reserve Bank (SARB) keeping the repo rate unchanged at 8.25% during its November meeting.

The rand ended the month weaker against the US dollar, euro and British pound, although weakness in the US Dollar Index softened the rand's blow somewhat against the US dollar. The rand ended November 1.1% weaker against the US dollar and 4.1% and 5.0% weaker against the euro and pound respectively. Nominal bonds ignored the weaker rand and followed the lead of global markets, with the FTSE/JSE All Bond Index jumping 4.7%.

Local equity markets also took its cue from the global risk-on sentiment and recorded a significant jump of 8.6% for the FTSE/JSE All Share Index, wiping out most of the previous three months' declines.

The Kruger funds benefited from the positive returns experienced both locally and globally and delivered the following returns during November 2023: The Kruger Ci Prudential Fund (4.0%); the Kruger Ci Balanced Fund (5.1%); the Kruger Ci Equity Fund (7.4%), the Kruger Ci International Flexible Feeder Fund (6.2%) and the Kruger Ci International Equity Feeder Fund (7.2%).

### DISCLOSURES

#### FAIS Disclosure

The annual fees include a fee of up to 1.10% payable to Kruger International and Analytics Consulting and a fee of up to 0.15% (Class A) or 0.25% (Class G) payable to Ci Collective Investments. These fees are stated exclusive of VAT. Please note that in most cases where the financial services provider (FSP) is a related party to the fund manager, the FSP/distributor may earn additional fees other than those charged by the fund manager. A FX fee of up to 0.05% (incl. VAT) on any FX transactions may be payable to Kruger International in addition to the annual fees referred to above. Kruger International Mauritius (KIM) is the investment advisor on the International Equity Fund and International Flexible Fund. The fund may invest in the KIM funds. KIM and SIP may earn an annual investment advisory fee of up to 1.00% on all such investments. Kruger International does not charge an annual management fee on the value of investments that are placed in the KIM funds.

#### Characteristics

This is a multi-asset high equity fund which means that it may invest in a spectrum of equity, bond, property and money market and tends to have an increased probability of short term volatility and aims to maximise long term capital growth. The fund may have a maximum equity exposure of up to 75% and complies with the regulation governing retirement funds. This fund may invest up to 45% of the assets outside of South Africa.

#### Risk Reward Profile: High

Typically, the lower the risk, the lower the potential return and the higher the risk, the higher the potential return. There is no guarantee that returns will be higher when investing in a fund with a higher risk profile. The risk profile for this fund is rated as high, as it may only invest up to 75% in equity securities, both locally and abroad. The risk refers only to volatility.

### RISK DEFINITIONS

#### Market Risk

Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment which will also affect the value of the securities held in the unit trust, thereby affecting the overall value of the unit trust.

#### Currency Risk / Foreign Exchange Risk

This risk is associated with investments that are denominated in foreign currencies. When the foreign currencies fluctuate against the South African Rand, the investments face currency gains or losses.

#### Concentration Risk

Unit Trusts pool the assets of many investors and use the proceeds to buy a portfolio of securities. There are regulations in place which limit the amount that a unit trust may invest in securities, thereby spreading the risk across securities, asset classes and companies.

#### Liquidity Risk

This relates to the ability of the unit trust to trade out of a security held in the fund at or near to its fair value. This may impact on liquidity and in the case of foreign securities, the repatriation of funds.

#### Credit Risk

Credit risk arises where an issuer of a non-equity security or a swap is unable to make interest payments or repay capital, which could result in losses to the fund.

#### Total Return Swaps Risk

The fund may invest in total return swaps. Total return swaps are unlisted instruments issued by a bank to provide the return of a specific index. The value of the instrument is directly linked to the performance of the underlying equities in the index and will fluctuate in line with daily market movements. Some of the equity exposure in the fund could be derived through total return swaps instead of physically holding the underlying equities.

#### Inflation Risk

The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

#### Political Risk

The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

#### Tax Risk

This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which unit trusts are taxed.

#### Compliance Risk

This refers to the risk of not complying with the legislation, regulations, prescribed investment limits and internal policies and procedures by the manager or the fund manager.

This document is not intended to address the personal circumstances of any Financial Services Provider's (FSP's) client nor is it a risk analysis or examination of any client's financial needs. Collective Investment Schemes in Securities ("CIS") are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to this fund and are subject to different fees and charges. A schedule of fees and charges is available on request from Ci. Ci does not provide any guarantee either with respect to the capital or the return of the fund. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. International Investments may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. The fund may be closed from time to time in order to manage it more efficiently in accordance with its mandate. The Kruger funds are funds established and administered by Ci, and Kruger has been appointed to manage and market the funds. Ci retains full legal responsibility for this co-named fund. Additional information on the fund may be obtained, free of charge, directly from Ci. Ci is a Non-Voting (ordinary) Member of the Association for Savings & Investment SA (ASISA). Total Expense Ratio (TER): The above TER % has been annualised and indicates the percentage of the value of the fund which was incurred as expenses relating to the administration of the fund over the rolling 3 year period or since fund inception, on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER's cannot be regarded as an indication of future TER's. Transaction Cost (TC): The above TC % has been annualised and indicates the percentage of the value of the fund which was incurred as costs relating to the buying and selling of the assets underlying the fund. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER. Total Investment Charge is the TER plus TC which indicates the percentage of the value of the fund which was incurred as costs relating to the investment of the fund. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available. Calculations are based on actual data where possible and best estimates where actual data is not available. Performance quoted is for lump sum investment with income distributions, prior to deduction of applicable taxes, included. NAV to NAV figures have been used and is quoted net of all fees. The annualised return is the return of the performance period re-scaled to a period of one year. Performance is calculated for the fund and individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax.
